

Scientific Sectioning

The variety of subjects and subspecialties in the field of respiratory diseases, thoracic surgery, critical care and TB which are all among the headlines of Tanaffos Journal, inspired us to come up with a new idea. Tanaffos Journal has decided to categorize research projects conducted by national and foreign researchers into different sections based on their field of study. Therefore, from now on starting from this issue, Tanaffos Journal will have the following sections:

- *Clinical pulmonary medicine*
- *Interventional pulmonology*
- *Tobacco control and related topics*
- *Sleep medicine*
- *Critical care*
- *Molecular pathology*
- *Allergy and immunology*
- *Clinical Tuberculosis, laboratory and epidemiology*
- *Thoracic and tracheal surgery*
- *Pediatrics pulmonology*

With the cooperation of expert scientists and renowned researchers, we hope to be able to add more topics to the abovementioned list.

Mohammad Reza Masjedi, M.D.
